Ecogram: Holiday Energy Tips

Before heading home for the holidays, please think about what you and your unit can do to conserve energy.

- **TURN OFF** computers, monitors, power-strips, lights/lamps, and other appliances that use energy.

- **UNPLUG** appliances and equipment that use standby or vampire power. These typically include appliances that have lights, clocks, etc. that still display even when turned off (more on standby/vampire power here: [http://en.wikipedia.org/wiki/Standby_power](http://en.wikipedia.org/wiki/Standby_power))

Please see the attached flyer from the Office of Campus Sustainability for more tips.

*Eco-Gram brought to you by the Library Environmental Committee: Michelle Allen, Hsiang-Ping Cha, Susie Garmo, Navi Gonzales, Susan Kendall, Andrea Kepsel, Elida Marti, Kriss Ostrom, Stephanie Perentesis, Heidi Schroeder, Aaron Tomak, and Mike Unsworth.*
